Three different series:

- Combat vehicles***

TOP GUN PIN

BOXART

HEAD

When creating the head, we tried to make undercuts that make it difficult and very expensive to copy and cast the head. Therefore, this item appears in the box mostly as a 3D printed part. The cat moustache is not included in the box. It is recommended to make them from wire or drawn thread.

GLASSES

This part is only available as a 3d printed part in the kit. One of the stems of the glasses is detailed, which makes it difficult to form from rubber and thus to copy.

MILITARY PATCHES

The military patches are based on the original patches. Design with sophisticated details. The print contains the exact shapes and details, making them easy to colour-paint even for beginners.
